

BOULEVARD RENTAL'S TIPS FOR : BEVERAGE FOUNTAINS

NOTE:

Beverage fountains are designed to circulate clear beverages. Use of beverages with pulp, seeds, fruit, rinds, etc. will restrict the flow of beverage and may give unsatisfactory results. Use of ice cream or other foamy punches may also restrict the flow of the beverage.

Operation Instructions:

Pour approximately two quarts of beverage in lower reservoir and turn switch to ON. If beverage does not circulate within one minute, turn switch to OFF for 10 seconds. Repeat this procedure several times until beverage flows freely.

If this procedure fails, pour beverage in top reservoir, with switch in ON position until pump is activated.

IMPORTANT: DO NOT run fountain dry. DO NOT immerse base in water.

Cleaning Instructions:

After use, empty out remaining beverage and fill lower reservoir with two gallons of warm water and let circulate for five minutes.

Empty the unit and repeat again.

DO NOT use scouring pads or any type of abrasive for cleaning.

DO NOT take apart.

Helpful Hints:

To chill a beverage, use chunks of ice in the bowl, ice cubes on a plastic bag or several pieces of dry ice in the bowl.

Pre cool beverage whenever possible to at least 36 degrees before adding to fountain.

When using carbonated beverages pre chill to at least 36 degrees before adding to fountain. To avoid dilution, place bags of ice enclosed in plastic bags in the fountain. Carbonation will dissipate after 10-20 minutes of re-circulating in the fountain. It is advisable to add smaller quantities of mixtures to the fountain from time to time to maintain carbonation. To obtain best results from your rental fountain, follow the above instructions carefully.

If problems not covered above are encountered, contact your professional party rental center.

REMEMBER, you are renting this equipment. Be sure your rental center explains the terms of your rental contract so that you are familiar with any damage or additional charges. Complete your party by renting glasses.
